Icom Features P25 and Satellite Solutions at APCO 2021

KIRKLAND, Wash. (August 2021) – Icom America is excited to be back in person at APCO 2021! This event runs from August 15th – 18th in San Antonio, Texas, hosted at the Henry B. Gonzalez Convention Center. Icom will be presenting various interoperable public safety communications solutions, including P25, LTE, IDAS™, and satellite radios, with our popular RoIP gateway – the VE-PG4. Find us at **booth 737** during exhibit hall hours.

Icom's VE-PG4 connects radios of disparate protocols into one seamless network, small or large, local to national. You can easily interconnect P25, LTE, IDAS, and satellite radios, even SIP phones. Comparable systems would require several additional devices, further complicated installation, more time, and be more costly.

Take your organization's network to the next level with Icom's IC-SAT100 handheld satellite radio. The IC-SAT100 allows users to communicate with a group of PTT radios at the push of a button by utilizing Iridium's® network of 66 LEO satellites covering the entire globe – including both poles. The IC-SAT100 also provides wide-area global communications to users in remote locations, ensuring they can connect to their teams. If an event causes interruption to terrestrial networks, the IC-SAT100 is an excellent choice for backup comms.

With the VE-PG4 at the center of your communications system, the connectivity options are endless. Whether your team uses P25, LTE, IDAS, or satellite, or a combination of many, the VE-PG4 is a comprehensive solution for all of your interoperability needs.

AIR. LAND. SEA.

APCO 2021 is APCO International's Annual Conference & Expo. It is the premier event for public safety communications officials, from frontline telecommunicators to comms center managers to public safety communications equipment and services vendors. Starting August 15, the expo offers four days of educational sessions, committee meetings, and special events, paired with two full days of exhibits.

Icom is known the world over for manufacturing the most innovative land mobile radios. In a world where technology is ever-evolving, Icom continues to stand the test of time with leading-edge forward-thinking. Radio users worldwide choose Icom for their legendary durability, quality, dependability, and ease of use.
